STANDARD TAPE QUALITIES:

- **Industrial Vinyl (E300)** Standard 3-5 year, perfect for most applications.
- **Premium Vinyl (ST700)** High quality 5-7 year, for higher durability.
- ★ **High-Tack (HT700)** High tack adhesive, ideal for difficult surfaces like wood, concrete, oil and low friction plastics.
- **Polyester (PT700)** High tack adhesive, high temperature, low halide - ideal for machine plates and pipes.
- 🔥 **High Temperature Tape (H250)** High tack adhesive and extra high temperature resistance.
- ❄️ **Cold Weather Tape (CW200)** Good adhesion to extremely cold surfaces.

SPECIAL MATERIALS:

- Removable Tape (M300)** Removable tape for temporary signs.
- Reflective Tape (RT500)** Reflective tape for indoor and outdoor usage.
- Fluorescent Tape (FL500)** Fluorescent tape with a very high visibility.
- Photolum. Tape (RG500)** Glow-in-the-dark tape for signs that need to remain visible after a power cut.
- Tags (T300)** For Lock-out/Tag-out, in a large range of colours and sizes. Printable and extremely tough.
- Pre-printed labels** Perfect for multi-colour signs and logos.
- Die-cut labels** Durable industrial die-cuts. Available in several qualities, colours, shapes en sizes.
